

About Sculptra® Aesthetic

**Age doesn't have to look the way it used to. It's more subtle.
More gradual. Shouldn't your anti-age be just as subtle?**

Introducing Sculptra® Aesthetic (injectable poly-L-lactic acid). Not an overnight miracle. Long lasting. Not a quick-fix. The first facial injectable that gives you subtle results over time. Replacing lost collagen. Giving you a more natural-looking appearance, without giving you away. A full treatment of Sculptra Aesthetic, an average of three injection sessions over a few months, can last up to two years.* So you have more time to see how sensational subtle can be. Welcome to the new age of anti-age.

Sculptra Aesthetic is a new type of facial injectable made from poly-L-lactic acid, which helps to replace lost collagen. It helps correct shallow to deep facial wrinkles, and folds,** that appear with aging by replacing lost collagen. The main ingredient is a biocompatible, biodegradable synthetic material that has been used by physicians for decades.

*Individual results and treatment sessions may vary.

**Safety and effectiveness of Sculptra Aesthetic have not been evaluated in areas other than nasolabial wrinkles and folds in clinical trials.
