

Is Sculptra® Aesthetic right for you?

A more youthful looking appearance that can last up to 2 years*

Sculptra® Aesthetic (injectable poly-L-lactic acid) helps correct shallow to deep facial wrinkles and folds,** that appear with aging by replacing lost collagen. It works gradually, producing a more natural looking appearance that can last up to 2 years.* If you want a more youthful looking appearance without looking like you've had work done, then Sculptra Aesthetic may be the right choice for you.

GRADUAL results

Each Sculptra Aesthetic injection works to gradually improve the overall appearance of facial wrinkles and folds.** Because the process is gradual, the effects of Sculptra Aesthetic are achieved through completing the full course of treatment as recommended by your physician. Sculptra Aesthetic is injected in the deep dermis in a series of treatments administered by a Sculptra trained physician. On average, 3 injection sessions are needed over a period of a few months.

NOTICEABLE results after treatment

Sculptra Aesthetic works over time. That's why it's important to keep going to all your treatment sessions as recommended by your physician. Following a simple aftercare routine that includes short facial massages will also help you get the most out of Sculptra Aesthetic. Each session builds on the last to produce a more natural looking appearance that doesn't look like you've had work done.

REPLACES, RESTORES, and REFINES

Sculptra Aesthetic is a facial injectable that works gradually in a series of treatments — on average 3 injection sessions over a few months — for subtle, more natural looking results. It begins to work within the deep dermis, where your skin's structure is reinforced as Sculptra Aesthetic helps to replace lost collagen. This reinforced collagen structure provides a foundation that gradually restores the look of fullness of your shallow to deep facial wrinkles and folds that have depleted over time. The result? Sculptra Aesthetic is different because it gradually and subtly corrects these facial wrinkles and folds. This can provide a refined, more youthful looking appearance that can last up to 2 years.*

*Individual results and treatment sessions may vary.

**Safety and effectiveness of Sculptra Aesthetic have not been evaluated in areas other than nasolabial wrinkles and folds in clinical trials.
